📍 Lucknow, India

### Summary

Result-oriented Web Developer with a strong foundation in Computer Applications (MCA) and hands-on experience in building scalable ERP and venue management systems. Deep involvement in the full software development lifecycle (SDLC), utilizing the .NET with MSSQL and PHP/MySQL to deliver user-focused solutions. Adept at writing clean, maintainable code and optimizing data flow between client and server to enhance application performance. Passionate about driving operational efficiency through digitization and regulatory compliance.

### Work Experience

**Web Developer** Jul. 2025 - Present

**Xpert Safety Solutions Private Limited**

- Developed and maintained dynamic web applications using React and PHP/MySQL, enhancing functionality and user experience.
- Developed and maintained full-stack features for ERP systems and venue management platforms, enhancing user experience and system efficiency.
- Developed responsive user interfaces and robust APIs, optimizing data flow between client and server to enhance user experience and application performance.

### Projects

**Inventory Management System**

**For UPATS**

- Developed a robust Inventory and Staff Management System that automates asset allotment, requests, and resource tracking through a hierarchical role-based access control (RBAC) architecture. Integrated bulk data processing via Excel and dynamic team registry modules to streamline organizational workflows and ensure data accuracy.
- Engineered a multi-tier authentication system for Admin, Headquarters, Store Managers, and Independent Departments.

**Examination Management System (For Dr. Ram Manohar Lohia Institute of Medical Sciences)**

- Engineered a scalable, web-based examination portal to digitize the entire student assessment lifecycle from enrollment to results.
- Streamlined complex administrative workflows, ensuring data integrity and operational efficiency for the university.
- Developed dynamic modules for online exam form submission and fee integration, eliminating manual data entry errors.
- Implemented robust bulk processing tools for the instant generation of PDF Admit Cards and Verification Sheets.
- Designed intricate backend logic to automate result processing and SGPA/CGPA calculations, ensuring zero-error grade publication.

**ERP**

- Designed, developed, and implemented a comprehensive Enterprise Resource Planning (ERP) system for Xpert Safety Solutions Private Limited, specifically tailored for skill development and vocational training projects (similar to the Kaushal Bharat).
- The system digitized the entire training lifecycle, ensuring regulatory compliance and operational efficiency across 12 key modules: Strategic & Funding: Proposal Management. Core Operations: Candidates, Center, Batch, and Training Management. Quality & Standards: Inspection Management and OJT Management. Outcome: Placement Management, Employer Management, and Certification tracking.
- Key Achievement: Successfully centralized operations from project initiation to final placement, significantly improving data accuracy, reducing manual effort, and streamlining the government-mandated inspection and reporting process.

**VMS SmartCheck**

- Designed and implemented a dedicated Venue Management System (VMS) to centralize and streamline the management of all venues for the organization.
- This system served as a core repository for venue-specific data (infrastructure, capacity, compliance status). Key features include: Data Input: Enables front-end Corporate Sales (CS) teams and Admin staff to input, update, and

- manage comprehensive venue details. Centralized Reporting: Provides Admin Panel functionality for data validation, status monitoring, and instant downloading of compiled venue information for audits, project proposals, and regulatory submissions.
- Impact: Improved data accuracy and standardization across all physical locations, significantly accelerating the due diligence and approval process for new training centers.
